Dear Parent / Carer

Food Technology

In line with other secondary schools across the country and in order for students to gain key skills required in Food Technology, all students are expected to be actively involved in practical cooking. If students are unable to cook, although alternative work is provided, they miss out on the most valuable aspects of the course.

In order to aid advanced planning for families, we are going to publish all the ingredients required each fortnight on Teams. This allows two weeks to purchase the ingredients. We have tried to limit the number and expense of the ingredients required for each dish. Teachers may suggest possible extras if students wish to expand on their creations, but this will be very much optional.

Clearly this has financial implications, so please do not hesitate to contact us as soon as possible if there are any issues. If we know in advance it gives time to develop solutions. If you have any concerns, we will do all we can to help.

If we have not been contacted and students do not bring ingredients without a valid reason we will issue an after school detention. We hope this will be a last resort and not aimed at any student with a valid reason.

Please do not hesitate to contact me for further information.

Kind regards

Mrs. L Beer
Food Technology Lead
