Dear Parent/Carer

SUPER CURRICULUM

We passionately believe that extending learning far beyond the classroom vastly enriches a student's school life. To develop this, we have introduced a new concept this year: The Super Curriculum.

In the Super Curriculum, staff will direct students to a range of visual, audible and written information which dovetail with topics being studied. An example being evolution and adaptation in science, which could be supported by a link to a documentary exploring Darwin's discoveries in the Galapagos Island. In PE, a link to the inspirational life story of Jesse Owens may be suggested or in Art, a podcast of Bow down: Women in Art.

These resources aim to deepen and widen understanding, offering formats that can hook students into their learning. Following all the suggestions is not the aim. We hope students dip into areas, discover fields of inspiration and aspiration and follow their own path. However, the Super Curriculum is designed to supplement lessons, extend conversations with teachers and peers and do not exist in isolation to what we are doing in class.

We believe it will be through dialogue with staff, parents and peers that we will first start to feel the impact. Often extended knowledge is an aspect that helps determine high level exam success.

The Super Curriculum will be updated each month with new links and material, and will evolve in response to student feedback.

We would encourage you to get involved with your child in order to make the most of this resource. Please click on the link below which will direct you straight to our website:
