

FIRST AID POLICY (SUPPORTING STUDENTS WITH MEDICAL CONDITIONS)

Mission Statement

Empowering everyone to be the best they can be.

1. **Truth** – We will pursue truth open-mindedly, seeking to help students to enquire, question and challenge, helping them to be well-rounded, resilient, confident, independent learners with a love for learning.
2. **Respect** – We will create a safe community that has at its core an understanding of deep respect for self, for others and for the environment; strong relationships are key.
3. **Equality** – We will provide high quality teaching and learning, delivering a broad, knowledge rich curriculum, where high aspirations are the norm and success is celebrated, to all students regardless of their background, ethnicity, religion, gender, educational need.
4. **Excellence** – We will provide students with opportunities in which to excel, to empower them to make free choices as a foundation for the best possible future; with outcomes in line with or better than their peers nationally.

Executive Head teacher: Jen Veal

Assistant Head teacher: Dan Vile

First Aid Officer: Tamara Dixon

First Aid Leads: Sue Gilson/ Yolanda Davey

SDCC reviewed this policy: June 2024

Ratified by the Trust: 11 July 2024

This policy will be reviewed annually.

South Dartmoor Community College

Introduction

The Health and Safety at Work Act 1974 places duties on employers regarding the health and safety of their employees and others who are affected by their undertakings. The Health and Safety (First Aid) Regulations 1981 require employers to assess the first aid needs and provide adequate arrangements.

South Dartmoor Community College wants to ensure that students with medical conditions receive appropriate care and support whilst at college, so that they have full access to education, including school trips and physical education.

The College is an inclusive community that aims to support and welcome students with medical conditions, as follows:

- Schools, local authorities, health professionals and other support services must work together to ensure that students with medical conditions receive a full education and can take part in all college activities.
- The college has a responsibility to make itself welcoming and supportive to students with medical conditions who currently attend, and to those who may enrol in the future.
- The college aims to provide any student with diagnosed medical conditions, the same opportunities as others at the college.
- The college understands that some medical conditions that require support at school will affect quality of life and may be life-threatening.
- The college aims to ensure that the focus is on the needs of each individual student and how their medical condition impacts on their school life. The college also understands that students with the same medical condition will have their own individual needs.
- The college understands that medical conditions may impact on a student's ability to learn and our aim is to provide assurance to parents and students that the college is able to provide effective support, promoting self-confidence and self-care.
- The college understands that there are social and emotional implications associated with medical conditions.
- The college will ensure that all staff understand their duty of care to students in the event of an emergency.
- All staff understand the common medical conditions that affect students at the college, and receive appropriate training to provide the support that students need.
- Students with medical conditions are entitled to a full education and have the same rights of admission to school as other students.

Any questions regarding this policy or the arrangements describing within should be referred to the First Aid Officer in charge of the First-Aid room - DSL or the Assistant Head Teacher – Culture.

Preventing the spread of infections

The College Prevents the spread of infections by ensuring:

- We support the NHS immunisation team with routine immunisation, high standards of personal hygiene and practice, particularly handwashing, and maintaining a clean environment.
- We would contact the Public Health Agency Health Protection Duty Room(Duty Room) on 0300 555 0119 or visit www.publichealth.hscni.net or [Preventing and controlling infections - GOV.UK \(www.gov.uk\)](http://www.gov.uk).
- Children with rashes should be considered infectious and assessed by their doctor.

Safe management of blood and bodily fluids

What you need to know

Blood and bodily fluids can contain germs that cause infection. It is not always evident whether a person has an infection, and so precautions should always be taken.

South Dartmoor Community College

What you need to do

Cleaning blood and bodily fluid spills

- Clean any spillages of blood, faeces, saliva, vomit, nasal discharges immediately, wearing PPE.
- Use gloves and an apron if you anticipate splashing and risk assess the need for facial and eye protection.
- Clean using a product which combines detergent and disinfectant that is effective against both bacteria and viruses. Manufacturer's guidance should always be followed. Cleaning with detergent followed by the use of a disinfectant is also acceptable. It should be noted that some agents, such as NaDCC (Sodium Dichloroisocyanurate or Troclosene Sodium, a form of chlorine used for disinfection), cannot be used on urine.
- Use disposable paper towels or cloths to clean up blood and bodily fluid spills. These should be disposed of immediately and safely after use.
- A spillage kit should be available for bodily fluids like blood, vomit and urine.

Managing cuts, bites, nose bleeds and bodily fluid spills

Take standard precautions when dealing with any cuts or abrasions that involve a break in the skin or bodily fluid spills.

Be aware of the setting's health and safety policies and manage incidents such as cuts, bites, bleeds and spills accordingly.

These policies should include having nominated first aiders who are appropriately trained.

Use Standard Infection Prevention and Control (SIPC) precautions to reduce the risk of unknown (and known) disease transmission.

These include:

- Wearing gloves when in contact with blood, bodily fluids, non-intact skin, eyes, mouth, or nose (washing grazes, dressing wounds, cleaning up blood after an incident) and wearing a disposable plastic apron.
- Carefully cleaning the wound under running water if possible or using a disposable container with water and wipes; carefully dab dry.
- Covering all exposed cuts and grazes with waterproof plasters.
- Keeping the [dressing clean by changing it as often as is necessary](#).
- Managing all [spillages of blood or body fluids](#).

Response to injury

2.1 Term time on campus – normal school day hours

It is the responsibility of the injured person or the person who discovers an injured person to ensure first aid advice is sought immediately. All serious injuries should be reported to the emergency services immediately, and their advice followed. Further guidance on this matter can be found in Appendix 5 – when to call an ambulance.

Should staff be unaware who can administer first aid, the injured person or person who discovers the injury must notify the school reception or First Aid Room. On receipt of the report, the reception or First Aid Room will be able to advise further who can provide first aid, operate the defibrillator and any further steps as required.

If the injured person is taken to hospital for treatment, the Assistant Head Teacher – Culture & First Aid Officer - DSL must be informed immediately. The parents of the injured student will be notified by a first-aid member of staff when a student requires hospital treatment, involves a head injury or when the student needs to be collected. Other injuries may be notified to the parents as appropriate, at the discretion of the First Aid Officer. Following an incident where hospitalisation is required, a follow-up call will be made the next working day by a first-aid member of staff.

South Dartmoor Community College

All head injuries must be immediately reported to the First Aid Room so that follow up assessments can be carried out in accordance with Appendix 4 – Dealing with head injuries/concussion.

2.2 Term time off campus – normal school day hours

It is the responsibility of the person in charge of the trip or event to ensure first aid is administered and provided. First aid may be provided may be administered by a trained first aider only within the event/trip destination venue or nearest hospital A&E department. The person responsible for the trip must consider first aid arrangements as part of the risk assessment process. The school does not require to see the First-Aid certificates of the staff members if the destination venue has First-Aid facilities. The school does require to have on record all the First-Aid certificates of the staff members if the destination venue does not have First-Aid facilities. This latter point is pertinent to all trips on Dartmoor or similar remote areas.

Arrangements

3.1 First Aiders

3.1.1 First Aiders on campus

First Aiders are employees who have been selected by the Assistant Head Teacher – Culture & First Aid Officer – DSL, as being suitable for training and appointment as a nominated first aider. A full list of first aiders is visible to all students and staff through posters placed strategically around the school (including the student reception).

The HSE and DfE recommend in low-risk environments that 1 member of staff for every 100 employees/students is present on site. When high-risk activities are being undertaken, more may be required. Based on student and staff numbers at the time of writing this policy, a minimum of 9 fully qualified first aiders are required. This shall be reviewed on an annual basis.

3.1.2 First Aiders off campus

For a finite number of activities, a First-Aider with the three-day qualification (First Aid at Work) or higher will need to be present amongst the staff in charge of the trip. The First Aider may be provided by South Dartmoor Community College or by the destination venue (external). These exceptional trips include:

- Oversees residential trips.
- UK Residential Adventure Trips.
- UK Non-Residential Adventure Trips.

3.2 First Aid Training

All chosen staff will either attend a 1-day emergency first-aid at work course or a 3-day first-aid at work course. In addition, the First Aid Officer can offer bespoke first-aid, defibrillator training, anaphylactic, epilepsy or other training to staff and students as appropriate.

All first-aid trained members of staff, regardless of length of training course, will be encouraged to complete and continue any CPD. This will be overseen by the First Aid Officer.

3.3 First Aid Kits

3.3.1 First Aid Kits for on campus

First Aid Kits are available in all key locations across the school site, including the sport facilities. Please see Appendix 3 for a full list of locations. Each First-Aid kit for on campus usage will require the following items in each kit:

- 3 x Antiseptic wipes.

South Dartmoor Community College

- Eye pad dressing.
- 10 x wash proof adhesive plasters.
- 1 x non-adherent dressing (5cm x 5cm).
- 1 x non-adherent dressing (10cm x 10cm).
- 1 x crepe bandage (5cm x 4m).
- 1 x pair vinyl gloves.
- 1 x Burn gel sachet.
- 1x pair of scissors.
- 6 x Safety pins.
- 1x Sport Instant Ice Pack [Koolpak].

3.3.2 First Aid Kits for off-campus Trips

First Aid Kits will be required for all school off-campus trips. These will be supplied by the First Aid Lead. All staff must contact the First Aid Lead with 48h notice prior to the trip starting, clearly stating the number of kits required and which students are going. This will allow enough time for the First Aid Lead to check the necessary number of First-Aid kits and make sure they are student specific. Upon taking a First-Aid Kit out of school, the member of staff needs to sign a form. This is stored in the First Aid Room, and requires the number written on the first-aid kit. After the trip, **all First-Aid kits must be returned** to the First Aid Lead and be signed in on the same form as above. All kits will be checked by the First Aid Lead before they are returned to circulation.

Each First-Aid kit for outdoor usage will require the following items in each kit:

- 1 x Tweezers.
- 6 x Safety Pins.
- 1 x Scissors (5.5cm Blade).
- 2 Pairs Vinyl Gloves.
- 1 x Spot Check Thermometer.
- 1 x Crepe Bandage 5cm x 4.5m.
- 1 x Triangular Calico Bandage 90 x 127cm.
- 1 x Open Woven Bandage 7.5cm x 5m.
- 6 x Hygienic Cleansing Wipes.
- 1 x Zinc Oxide Tape 1.25cm x 5m.
- 1 x Micropore Tape 1.25cm x 5m.
- 5 x 4-Ply Gauze Swabs 5 x 5cm.
- 3 x Burn Gel Sachets (3.5g).
- 1 x Strapping Tape 2.5cm x 2m.
- 2 x Sterile Eye Wash (20ml each).
- 1 x Pack of Assorted Plasters.
- 1 x Medium Wound Dressing 12 x 12cm.
- 2 x Low Adherent Dressings 5 x 5cm.
- 1 x Low Adherent Dressing 10 x 10cm.
- 3 x Wound Closure Strips.
- 1 x Small Eyepad Wound Dressing.

3.4 Legal Liability of First Aiders

To date in the UK, there have been no instances of first aiders being held liable for the first aid care they have provided. Nonetheless, liability cover is provided for first-aiders in line with the rest of the staff network, under the school insurance policy.

All work/school related injuries (burns, trip/falls, etc), will need to be recorded on the OSHENS paperwork. This report will be added onto OSHENS online, by the First Aid Lead or Operations Manager.

South Dartmoor Community College

3.5 Principal First Aider/ First Aid Officer

The principal First Aider for the school is the First Aid Lead in charge of the First Aid Room. All advice, queries and questions should be directed to them in the first instance. A full list of their duties can be found in Appendix 1.

3.6 Emergency Adrenaline Auto-Injectors (AAls) and Emergency Asthma Kits

All emergency medication, including AAls and emergency Asthma kits are held in the **Reception Room**. All staff who are First-Aid trained can administer these.

3.7 Automated External Defibrillator (AED)

The AED must only be used for the treatment of sudden cardiac arrest for all students, staff and visitors over the age of 1 year. If used, a debrief event should be held and led by the First Aid Officer to identify whether any future changes need to be implemented.

The Resuscitation Council states that whilst it is preferable that only First-Aider trained members of staff, individuals with no previous training (including all members of staff and visitors) are permitted to use the AED for the above purpose only.

The AED's are located

External – outside of central services building (accessible during community provision).

Internal – 1) main college reception.

2) outside PE office along drama corridor.

The battery and pads will periodically need to be replaced. These will be checked alongside the general function of the machine by the First Aid Officer/Operation Manager on an annual basis.

All First-Aid trained members of staff receive training on using this equipment in their 1 or 3 year training course. The First Aid Officer/Operations Manager is responsible for inspecting the AED during term time every 6 months. Records of inspection are kept in the First Aid Room.

The AED can be used if the casualty is pregnant.

3.8 Students with Medical Conditions

Parents and carers of students joining the school will complete a medical questionnaire identifying any medical conditions and medication that needs to be stored on school site. This process is overseen by the Transition Lead. Students who are identified to have medical needs are added to the medical conditions master list. This document details the condition, response, medication and all appropriate information that staff should be aware of. Individual Healthcare Plans (IHPs) are additionally put in place for students with significant medical needs. These are put together with the parents/carers and First Aid Lead, they are then reviewed on an annual basis. The students should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their IHCPs.

Students are encouraged to manage their own health needs and medicines, where competent to do so. They will be encouraged to take some responsibility for their own care. This will be agreed upon in discussion with parents and First Aid Lead and will be shown in their IHCP. It is also their responsibility to ensure that their medicine is brought to the Medical Room to be locked in the medicines cabinet. The main exceptions to this are asthma inhalers, blood glucose testing meters and auto-injector adrenaline pens, which students will carry with them at all times. Students are to take all forms of medication under the supervision of the school First Aid Officer/lead or First Aider sitting.

Students are permitted to carry their own personal emergency medication (inhalers, AAls and glucose tablets), a further stock for each student is kept in the school's main Reception.

South Dartmoor Community College

Should a student be scheduled for an off-campus trip, the appropriate emergency medication shall be supplied in the bespoke first-aid kit for that trip. Where feasible, it is the responsibility of the student to self-administer their medication. The First-Aid member of staff remains at disposal to offer a helping hand where required. Medication taken, needs to be signed by First aider and student (medical consent form inclosed in pack).

3.9 Medication

Medicines should only be administered at college when it would be detrimental to a student's health or school attendance not to do so. Where possible, it is preferable for medicines to be prescribed in frequencies that allow the student to take them outside of college hours. If this is not possible, the parents/carers of the student must complete and sign a 'Parental Agreement for a School to Administer Medicine' form prior to staff members administering medication. An appropriate supply of the medication may be provided to the college at one time to meet the needs of the student.

No student under 16 should be given any prescription or non-prescription medicines without written parental/carers' consent. If a situation arises where this is not possible, it will be reviewed on an individual basis. No student under 16 years of age will be given medication containing aspirin without a doctor's prescription. Students will never be prevented from accessing their medication.

The school will only accept medicines that are in date, labelled clearly with the student's name, and provided in the original container as dispensed by the pharmacist (except in the case of insulin which must be in date, but may come in a pen or pump rather than its original container) with dosage and storage instructions. The college will accept non-prescribed medicines, such as paracetamol, ibuprofen, in their original packaging. Medicines which do not meet these criteria will not be administered or kept on site.

Controlled drugs may only be taken on college premises by the individual to whom they have been prescribed. Passing such drugs to others is an offence which will be dealt with under the college's drug policy. Controlled drugs must be kept securely in our locked medicines cabinet. Named staff only will have access. A record should be kept of doses given, including time, date, how much given. Any side effects must be noted.

Medicines will be stored in the locked medicines cabinet located in the First Aid room. Suitable alternative arrangements will be agreed upon when the student is off-site on college trips, visits. Medicines and equipment such as asthma inhalers, blood glucose testing meters and adrenaline auto-injector pens are kept in an unlocked cupboard in the main school Reception. Any medications left over at the end of the course of treatment will, if possible, be returned to the student's parents or carers. If the parent/carer is in agreement, the college will arrange for the safe disposal of medicines at a local pharmacy. It is the duty of the First Aid Leader to ensure all medication stored in school is in date, and oversee the safe disposal at a pharmacy of any which

Written records will be kept of any medication administered to students. The trained staff member must always check dosage instructions before administering medicine. This will be found either on the prescribed medicine or on the Parental Consent for the Administration of Medicines form. The staff member must check the medicine log to ensure that medicine is given within the correct timeframe.

The college cannot be held responsible for side effects that occur when medication is taken correctly.

Parents/carers may request a copy of the record of medicines administered to their child, or self-administered under the oversight of a member of staff. Parents/carers will be informed if their child refuses to take prescribed medicine at the time specified or fails to report for the purposes of routine health checks or the taking of medication.

South Dartmoor Community College

3.10 Disposal of clinical waste

A sharps box and clinical waste bag is held in the First Aid Room, which is periodically collected by a registered clinical waste company. Disposable gloves, aprons, masks are available to all cleaners and staff members who visit the First Aid Room.

3.11 Risk assessments for trips off-campus

All trips must be approved in accordance with the school trips policy. In line with this, it is a requirement for members of staff to make adequate plans to cover for first aid provisions. All first kits must be requested with at least 48-hour notice as part of this process.

Appendix 1 – Responsibilities of the First Aid Officer/ First Aid Lead

- To closely work with the Assistant Head teacher – Culture and other members of senior leadership team on identifying and reviewing first requirements in accordance with legislation and the needs of the school.
- To closely work with and scrutinise the work of all the First Aiders in the school, in accordance with their responsibilities set out in Appendix 2.
- Ensure all first aid equipment is in date and readily available for all medication events.
- Ensure up-to-date training is kept accurate and adequate notification of renewal training is communicated to all the appropriate parties. This applies to the yearly refresher training as well as the 1 or 3 day course.
- Ensure first aid training for key members of staff is up to date, and provide additional training to trip leaders when taking students off site.
- Ensure the defibrillator is checked on an annual basis, and an accurate record of this stored in the Medical Room.
- Ensure all appropriate first aid procedures are followed, in particular with regards to accident forms and these are appropriately sent to Devon County Council/Oshens.
- Ensure medication is administered with the appropriate training
- Ensure all Medical Time Out cards are appropriately issued to students, and they know the appropriate times to use these.

Appendix 2 – Responsibilities of qualified First Aiders

- To closely work with the First Aid Officer/ First Aid Leads in ensuring all procedures are correctly followed.
- To complete annual refresher training.
- To help and assist individuals completing accident report forms.
- To arrange immediate transfer of a casualty to either the First Aid Room or to the hospital, depending on the seriousness of the injury and/or condition. They are to remain at the casualty's side until a more senior first-aider or hospital staff is present.
- To help safeguard the casualty's clothing and possession.
- To always respect the casualty's confidentiality.
- To only practise within their own competency and training.
- Cover the First Aid room when needed.

South Dartmoor Community College

Appendix 3 – SDCC process of First Aid

Students who are at South Dartmoor Community college and feel unwell

1. If a student reports being unwell, the teacher/support member of staff must make a risk assessment on if the student should remain in lessons. Typical examples of where a student might feel unwell but should stay in lessons include:
 - Stomach aches.
 - Feeling nauseous but not being sick.
 - Sore heads.
 - Small cuts or scratches that need a plaster.
 - Periods pains.
 - Thirsty.
 - Hay fever.

If a teacher needs support with these situations, they should call for the First Aider via the First Aid button (under students name) on ClassCharts. Staff will also clearly type in the comments, where the student is and why First Aid is needed.

2. If a student reports feeling ill during tutor time or there is a first aid emergency within your lesson or department, please press the First Aid alert button on ClassCharts to alert the First Aid member of staff on duty. This will alert the member of staff to come to your room, triage and if needed, escort the student to the First Aid room.

In case of a serious medical situation, student collapse, diabetic hypo etc then send a student runner immediately to reception so that a first Aider can be called. In addition, press the First Aid button on ClassCharts and type 'RED' in the comments before typing, where and reason.

During Break/Lunch or the First Aider is already triaging, Reception staff will also keep an eye on the ClassCharts First Aid button and will then call for one of our First Aid trained members of staff who will be able to assess the situation for the student.

If there is a serious accident (especially if this involves a head injury) or the student needs urgent attention, then call Reception who will send immediate assistance. SLT and First Aid Officer must also be informed.

First Aider or an appropriate staff member will contact home if the student needs to be collected.

3. Students with medical conditions will need to have a Health Care Plan put in place which will include a, Risk assessment and a Personal Emergency Evacuation Plan (PEEP). This will be written up by the First Aid Lead with Parent/Carers.
4. All incidents that require First Aid treatment must be recorded and any serious incidents recorded on OSHENS.
