Dear Parent/Carer

A Level Chemistry – Year 12 Action Plan

I am writing to discuss your child's recent performance in the mock exam for Chemistry. Through our analysis, we have identified specific areas where your child could benefit from some focused study. After reviewing the results, we understand that your child may need support in certain topics to excel in Chemistry. To address this, we have developed an action plan tailored to their individual needs for this half term and this has been shared with them as a paper copy and as an electronic document.

Our approach aims to help your child overcome any misconceptions and develop effective revision strategies. By breaking down the revision process into manageable chunks, we believe that your child can make steady progress and better prepare for future assessments. The action plan includes targeted tasks designed to reinforce key concepts and address areas where your child may need extra support. These tasks are structured to encourage active learning and engagement, fostering a deeper understanding of the subject matter.

Over the coming weeks, your child will have the opportunity to work through these tasks with guidance from their teachers. We are committed to providing the necessary support to ensure their success. Ultimately, our goal is to strengthen your child's grasp of essential Chemistry concepts and boost their confidence in the subject. We believe that with dedication and the right approach, your child can achieve their full potential in Chemistry.

We encourage you to discuss this action plan with your child and offer any additional support they may need at home. Together, we can help them succeed academically and build a solid foundation for their future studies.

If you have any questions or concerns, please feel free to contact us.

Kind regards

Kerri McCarthy
