

GEOGRAPHY

Welcome to the Geography Super Curriculum. Below you'll find a whole host of things to do to stretch yourself beyond the classroom curriculum.

What impacts our environment and climate, and what can we do to make a positive change?

Explore the major influences on our planet, including climate change, economic policies and natural disasters. Use the information below to research and understand how these factors impact human life and the environment. Learn why it's essential to address these challenges and how informed policies and resilient infrastructure can help mitigate their effects. By taking action and implementing sustainable solutions, we can better prepare for and adapt to a changing world.

READ

Read this BBC news article about the recent earthquake in Russia and its impact on both the people and the environment:

[Magnitude-7.4 earthquake rocks Russia's east coast of Kamchatka as tsunami warning called off](#) - msn.com

WATCH

Watch this video to learn about natural disasters in Pakistan and India, their impact on populations, and how both countries are adapting to climate change:

[Counting the Cost - Pakistan and India: What's the global cost of natural disasters?](#) - YouTube

LISTEN

Listen to this podcast about water scarcity caused by flooding, and discover how scientists and communities are working together to combat its effects and protect local areas:

[Troubled Water: Are We Running Out of Water? Episode 3](#) - BBC Sounds

DO

Using the website link below, explore how the UK's relationship with the sea is shaped by politics, trade and tradition—and why marine ecosystems are suffering as a result. Then, create a report on the vital role seas play in supporting international trade:

[How does the UK treat its seas?](#) - geographical.co.uk
