

# GEOGRAPHY

**Welcome to the Geography Super Curriculum. Below you'll find a whole host of things to do to stretch yourself beyond the classroom curriculum.**

What impacts our environment and climate, and what can we do to make a positive change?

Explore the major influences on our planet, including climate change, economic policies and natural disasters. Use the information below to research and understand how these factors impact human life and the environment. Learn why it's essential to address these challenges and how informed policies and resilient infrastructure can help mitigate their effects. By taking action and implementing sustainable solutions, we can better prepare for and adapt to a changing world.

## READ

Read the article below about the recent COP30 summit and discover how each country's government is setting achievable goals to help combat climate change:

[COP30: Five key takeaways from a deeply divisive climate summit](#) - BBC News

## WATCH

Watch the video on the COP30 conference. After hours of last-minute negotiations, the climate summit in Brazil reached a deal. However, campaigners hoping for strong commitments on reducing fossil fuel use and tackling deforestation were left disappointed. What impact could this have, and how might other countries learn from it?

[COP30 climate deal reached without plan to reduce fossil fuels](#) - YouTube

## LISTEN

Listen to this podcast exploring how the impacts of climate change will be felt unequally across the world, and the challenges posed by the politics of the climate movement in the Global North.

[SiC Podcast Episode 3: Toxic Politics of Climate Change](#) - YouTube

## DO

Using information from all videos and articles, create a fact file outlining the three biggest opportunities and challenges we face from governments' management of climate change, and how different countries are impacted unequally.

What actions can we take to mitigate these impacts, and what measures are currently in place to manage them?
