

# GEOGRAPHY

**Welcome to the Geography Super Curriculum. Below you'll find a whole host of things to do to stretch yourself beyond the classroom curriculum.**

What impacts our environment and climate, and what can we do to make a positive change?

Explore the major influences on our planet, including climate change, economic policies and natural disasters. Use the information below to research and understand how these factors impact human life and the environment.

Learn why it is essential to address these challenges and how informed policies and resilient infrastructure can help mitigate their effects. By taking action and implementing sustainable solutions, we can better prepare for and adapt to a changing world.

## READ

**How are countries using green energy to help mitigate climate change, and what are the opportunities and challenges of creating more sustainable energies?**

[More solar farms on the way after record renewables auction](#) - BBC News

## WATCH

**Watch this documentary about Patagonia and the vital role glaciers play on Earth:**

[Wilderness with Simon Reeve: Patagonia](#) - BBC iPlayer

**After viewing, create a list of the positive environmental impacts that glaciers provide.**

## LISTEN

**Listen to this podcast about how the environment has always influenced human behaviour. In modern societies, however, economics also plays a significant role. Anthropologist Professor Adam Kuper believes that urbanisation will change the shape of family life:**

[Urbanisation: Family Matters](#) - BBC Sounds

## DO

**Create a PowerPoint presentation on how energy, the environment and urbanisation are key to mitigating climate change and ensuring sustainable living.**
