

# GEOGRAPHY

**Welcome to the Geography Super Curriculum. Below you'll find a whole host of things to do to stretch yourself beyond the classroom curriculum.**

What impacts our environment and climate, and what can we do to make a positive change?

Explore the major influences on our planet, including climate change, economic policies and natural disasters. Use the information below to research and understand how these factors impact human life and the environment.

Learn why it is essential to address these challenges and how informed policies and resilient infrastructure can help mitigate their effects. By taking action and implementing sustainable solutions, we can better prepare for and adapt to a changing world.

## READ

Read the article below about how conflict affects resources and the economic impact it has around the world:

[US easing of Russia oil sanctions draws criticism](#)  
- BBC News

## WATCH

Watch the video below. What are tectonic plates, and how does tectonic activity influence Earth's physical geography?

[What Are Tectonic Plates? Our Earth and its Movements](#) - YouTube

## LISTEN

Listen to the podcast below. Why are our cities growing, and what does this mean for their populations? What are the main reasons that 50% of the world's population now lives in cities?

[Planetary Urbanisation and Operational Landscapes Podcast](#) - YouTube

## DO

Choose one of the three topics. Decide which one you think has the biggest impact on our quality of life. Consider the social, environmental and economic impacts.
