Empowering everyone to be the best they can be.

14 September 2026

Dear Parent / Carer

I am delighted to inform you that your child has been allocated a place on our Numeracy Fluency Programme starting next week, to support them with their basic maths skills.

Numeracy fluency refers to the accuracy at which a learner can accurately recognise and apply foundational concepts within maths. It is a vital skill for further understanding in later years of secondary education. During the trial we will be using Century Tech as the main platform. It is designed to help young people who need a boost in foundational maths topics.

Your child will have some dedicated intervention time built into their timetable to complete the Numeracy Fluency Programme. The intervention itself is carried out in a supportive and calm environment and will take place during Period 0, replacing their current tutor reading slot. For maximum impact, completing between two and four 20–30-minute sessions a week is recommended. The duration of the programme is six weeks, and we will review their participation and progress regularly. During the programme, your child's Sparx will still be set as their main home learning, however, you can also access Century Tech at home for extra exposure. If you want to support with this, please make contact for some simple guidance on how to best use the platform.

If you have any further questions regarding the Numeracy Fluency Programme, please do not hesitate to contact the SEND Department.

Kind regards

Ian Squires
